

Dr Shirin Heidari is the Founder and Executive Director of GENDRO, a Geneva-based international non-profit association dedicated to addressing gender bias in research and data. She is the lead author of the widely adopted Sex and Gender Equity in Research (SAGER) guidelines, a key instrument for closing gender evidence gaps. Through GENDRO, she provides technical support to research organisations and global health bodies, including the World Health Organization, to strengthen the integration of sex and gender dimensions in health research, policy, and programming.

She is also Principal Investigator of the Liminality Research Consortium at the Gender Centre, Geneva Graduate Institute, where she leads a collaborative multi-country project on sexual and reproductive health and rights in forced displacement, grounded in an intersectional feminist approach.

Previously, Dr Heidari served as Executive Director of Sexual and Reproductive Health Matters and Editor-in-Chief of its journal. At the International AIDS Society, she led the Research Promotion Department, advancing pioneering initiatives on women's health, including a consensus research agenda on HIV and women, and served as Editor of the Journal of the International AIDS Society.

She holds a PhD in clinical virology and experimental oncology from Karolinska Institute (2001) and has worked across research, policy, and advocacy in non-profit organisations, academia, and UN agencies. She has served as Board Member of Amnesty International Sweden, Council member of the European Association of Science Editors and founding chair of its Gender Policy Committee, member of the Impact Committee of the Human Immunome Project and Commissioner on the Lancet Commission on Women, Power, and Cancer. She currently serves as Co-Vice President of the Foundation Board of the Geneva International Film Festival and Forum on Human Rights.

A TEDx speaker and author of numerous publications, Dr Heidari was recognised in 2022 as one of twelve influential figures shaping the future of International Geneva. Her work was profiled in *Cell* in 2024, and *The Lancet* in 2025.

« Beyond Bias: The SAGER Framework as a Catalyst for Equitable Health Research »

This lecture introduces the Sex and Gender Equity in Research (SAGER) guidelines as a practical and normative framework for strengthening equity, rigour, and relevance in health research. It examines how systematic integration of sex and gender considerations across the research cycle, from study design and data analysis to reporting and knowledge translation, can reduce bias and close persistent evidence gaps. Drawing on real-world applications across disciplines and global health contexts, the lecture highlights the role of SAGER in shaping institutional policies, editorial standards, and research practice, and reflects on its potential to catalyse more inclusive and accountable health research systems.

**Join the lecture on Thursday, 26 February 2026 at 4:00 pm (CET)
on-site at Mittelstrasse 43, room 320 or on zoom:**

<https://unibe-ch.zoom.us/j/65092640608?pwd=prlNrrrJCxXJRKbsJlcwIMzGUylavW.1>

Meeting ID: 650 9264 0608, Passcode: 731336

Join us for an aperitif after the talk for a fantastic networking opportunity with fellow participants and the speaker!
